Welcome to the Heart Catheterization Laboratory at Fairview Ridges Hospital

A catheterization laboratory, or “cath lab”, is a procedure room with advanced imaging equipment that allows your physician to see inside your coronary arteries and diagnose common and unusual conditions that affect the heart. People with conditions such as heart rhythm irregularities, heart disease and heart failure are able to receive more advanced care.

Award-winning heart care

Our diagnostic heart Catheterization Lab is a partnership of Fairview Ridges Hospital and Minnesota Heart Clinic, a part of University of Minnesota Physicians. Minnesota Heart Clinic cardiologists are nationally recognized for their patient treatment outcomes in areas that include heart disease, heart attack and heart failure.

Cardiologists see patients at Minnesota Heart Clinic on the hospital campus and work with your primary care provider to assure the best possible heart care for immediate and chronic conditions.

Patients who require more complex care, heart surgery or a heart transplant will be referred to Fairview Southdale Hospital in Edina or to the University of Minnesota Medical Center, Fairview. Minnesota Heart Clinic physicians work with other specialists including Minnesota Vascular Clinic, Suburban Radiology and Twin Cities Heart and Lung to deliver the best in heart care and service.

Comprehensive cardiology services at Fairview Ridges Hospital

Our diagnostic heart Catheterization Lab is but one part of the comprehensive cardiology services we provide on-site seven days a week. Cardiovascular services for rapid and accurate diagnosis and treatment include:

- cardiology consultations;
- stress testing, echocardiograms and nuclear imaging;
- coronary, carotid and peripheral angiograms;
- clinics that specialize in heart failure and heart rhythm irregularities;
- chest pain evaluation clinic;
- heart disease prevention and wellness; and,
- an advanced cardiac rehabilitation program.

Other services available at this site include the evaluation and treatment of vascular diseases, such as peripheral artery disease (PAD).

Appointments and clinic hours

Appointments for diagnostic care at the Catheterization Laboratory are made through Minnesota Heart Clinic or by your primary care provider. Minnesota Heart Clinic is conveniently located next to the hospital on the Fairview Ridges Hospital campus.

To schedule an appointment with a cardiologist at Minnesota Heart Clinic, call **952-924-9005**. Clinic hours are 8 a.m. to 4:30 p.m., Monday through Friday.
